- **Reflection/ Discussion - Bias in Artificial Intelligence Essay**
- Web quest / Research Questions- Make sure you answer all the these questions as you are doing your reflection.
- **Task:** In your response to the prompts below, you will demonstrate your understanding of AI Bias by
    - integrating textual evidence from what you learned and know about it and
    - also showing your ability to synthesize the ideas of AI bias and supporting your own claims.
    - You will also need to include the input (quotation/belief) of an article or writer. You will need to conduct a search on-line to find what other people would say in response to AI Bias
    - Include a refrence to any article or site used .
    - How do you identify AI bias?
    - What type of bias is present in AI?
    - How AI bias happens
    - algorithms, like recipes, are a set of instructions that modify an input to produce an output,- how can input be tapered with or modified to creat bias in the output ?
    - Can your opinion affect your algorithms in making the ”best” peanut butter and jelly sandwich algorithm .
    - In your “Train and test a machine learning tool”” assignment to classify drawings of happy and sad faces can your opinion creat a bias in the machine application.
    - How do you fix AI bias or – or how to eliminate it?
    - Can AI be Trusted?
    - Reason about how human bias plays a role in machine learning
    - ethical AI issues
    - Include the input (quotation/belief) of an article or writer.
    - Consider Gramerly as an example and see how it could be bias and reflect on it and say what you need to do about it.
    - You will need to conduct a search on-line to find what other people would say in response to AI Bias .

- Finally explain and analyze your opinion based on your imagination or other experiences - it does not have to come from a video or news article.

- How will Baise in AI impact people's lives
  - What is expected – desired (purpose) impact
  - What is expected – undesired (tradeoffs) impact
  - What is unexpected – desired impact
  - What is unexpected – undesired impact
