How can a change in an environment affect the organisms living there?

Brainstorm at least 3 different answers to this question.

Think about the environmental change for each organism and the effects of each. Record your responses.

Giraffe

Environment	**Natural environment**	**Desert**
Benefits		
Disadvantages		

Do you think that the giraffe would be able to survive in this environment? Support your response.

Polar Bear

Environment	**Natural environment**	**Warm Beach**
Benefits		
Disadvantages		

Do you think that the Polar bear would be able to survive in this environment? Support your response.

Hare

Environment	**Natural environment**	**Grassy field**
Benefits		
Disadvantages		

Do you think that the Hare would be able to survive in this environment? Support your response.

Frog eggs

Environment	**Natural environment**	**Icy pond**
Benefits		
Disadvantages		

Do you think that the Frog eggs would be able to survive in this environment? Support your response.
