Exit Ticket Organ Systems

Name _____

1. **Which system in the human body is responsible for transporting blood throughout the body?**
   a. Digestive system
   b. Circulatory system
   c. Respiratory system
   d. Nervous system

2. **What is the main function of the respiratory system?**
   a. Breaking down food
   b. Transporting oxygen to cells
   c. Removing waste products from the blood
   d. Producing hormones

3. **Which organ is primarily involved in the digestive system?**
   a. Heart
   b. Lungs
   c. Stomach
   d. Kidney

4. **What is the role of the nervous system in the human body?**
   a. Circulating blood
   b. Sending signals to and from the brain
   c. Filtering waste from blood
   d. Producing red blood cells

5. **Which system includes bones and joints and provides structure to the body?**
   a. Muscular system
   b. Skeletal system
   c. Integumentary system
   d. Immune system

Exit Ticket Organ Systems Key

1. Which system in the human body is responsible for transporting blood throughout the body?
a. Digestive system
b. Circulatory system
c. Respiratory system
d. Nervous system

2. What is the main function of the respiratory system?
a. Breaking down food
b. Transporting oxygen to cells
c. Removing waste products from the blood
d. Producing hormones

3. Which organ is primarily involved in the digestive system?
a. Heart
b. Lungs
c. Stomach
d. Kidney

4. What is the role of the nervous system in the human body?
a. Circulating blood
b. Sending signals to and from the brain
c. Filtering waste from blood
d. Producing red blood cells

5. Which system includes bones and joints and provides structure to the body?
a. Muscular system
b. Skeletal system
c. Integumentary system
d. Immune system

Answer Key

1. b. Circulatory system
2. b. Transporting oxygen to cells
3. c. Stomach
4. b. Sending signals to and from the brain
5. b. Skeletal system
