1. Student Prediction Sheet

Scenario: Two bullets are released from the same height — one is dropped straight down, and the other is fired horizontally. Predict which one will hit the ground first and explain your reasoning.

Your Prediction:

_____

_____

_____

_____

_____

_____

Why do you think this will happen?

_____

_____

_____

_____

_____

_____

_____

_____

What variables do you believe affect the time it takes to hit the ground?

_____

_____

_____
