Introduction

Welcome Cadet!

The goal of the activity is to reflect on your knowledge of historical military advancements that have impacted the human society.

Select TWO historical military advancements you believed changed our history for forever. Capture an image of the event or the technological device that caused the event to take place. Provide a description for your image and form your STEM connections.

Lastly, provide a resource link should you inspire your peers to research more about your selection.

Sample: Bombing of Hiroshima and Nagasaki

Description of Historical Event: The US military development of an atomic bomb changed our human history. In the event of the bombing of the Japanese cities, Hiroshima and Nagasaki, 129,000 persons were killed. World War II is the only recorded use of a nuclear weapon in warfare.

STEM Connection - Why is the event important?

- Science - An atomic bomb is created from a combination of chemical ingredients that enter a reaction
- Technology - (Do your best to form your own connections with your partner)
- Engineering -
- Mathematics -

Think - Pair - Share

1. Review your work with your partner.
2. Ensure all response sections in this presentation is completed (these are your notes).
3. Be prepared to share out to the whole class.
4. Finished? Check in with your instructor.
