Structured Notes – Flood Risks and Impacts Module

Use this template to organize your notes for each unit of the Flood Risks and Impacts module. Repeat this page for Units 1–5 as needed.

Unit Title: _____

1. Main Idea / Summary

Write 2–3 sentences summarizing the main concept of this unit.

2. Key Vocabulary

List and define 3–5 important terms from this unit.

Term	Definition	Example or Sketch

3. Simulation/Data Observations

- What variables did you test?
- What patterns or outcomes did you observe?
- What did the graphs or visuals show?

4. Cause & Effect / Relationships

Describe how different factors (e.g., permeability, precipitation, topography) influenced flooding.

5. Real-World Connection

Briefly explain how this topic connects to real-world events, locations, or issues.

6. My Reflection

Respond to one of the reflection questions from the unit (either pre- or post-unit).
