Introduction to Floods Reflection

Directions: Respond to the following prompts.

Step 1: Estimate Your Height (Round to the Nearest Foot)

Example: If you are 5 feet 4 inches, round to 5 feet.

My height: _____ feet

Step 2: Subtract Your Height from 33 Feet

Use this formula:

33 feet (flood height) – your height = _____ feet of water above your head

My result: 33 – _____ = _____ feet of water above me

Step 3: Reflect in Writing

What does this number mean to you? Consider the following questions in your response.

- What would it feel like to be surrounded by that much water?
- What would you be worried about?
- How does this help you understand the danger of floods?

Write your response below (3–5 sentences):
