Where is the Water?

1. Describe a time when you interacted with water. Where were you? What happened?

2. Take five minutes to draw or list as many places as you can think of where we could find water.

3. Think about the diagram of the water cycle you reviewed as a class.
   Look back at your list for question two and circle the items that were on the diagram.

   List any items that were on the diagram but were not included in your list.
